HIGH DEFINITION
GLASS
FOR ARCHITECTURE

Digital In-Glass Printing
Imagine it. Print it in glass.

High Definition Glass (HDG), 720 DPI digitally printed glass is now available from Hartung Glass Industries. HDG provides a new medium for artistic expression while enabling control over all architectural and decorative glass properties.

The versatility of digital printing combined with the durability of ceramic inks makes HDG the preferred choice for any artistic glass application.

- Translucency/opacity
- SureStep slip resistant stair treads
- Solar heat gain coefficient
- Privacy levels
- Bird-friendly design

OUTSTANDING FUNCTIONAL PERFORMANCE

The latest innovations in glass printing technology open new opportunities to combine boundless creativity with highly controlled functionality. Full expression of artistic vision and outstanding budget-smart performance delivery are now possible with digital ceramic in-glass printing.

Easy implementation – of any pattern or design, with unlimited colors, and high resolution for fine details.

Simplify Installation – HDG has the ability to custom print each lite/IG unit with a tag number or label for easy installation and replacement.

Durability and accuracy – Inks are fused into the glass, providing unmatched resistance to scratching, acid, UV light and weather. Precise micro-drop printing allows accurate photorealistic and graphic designs.

A new medium for artistic expression – The ability to combine transparent, translucent and opaque details, full freedom in colors and shades and the possibility to create double-vision designs.

When to select HDG Digital In-Glass Printing:

- One-offs or low volume projects (no screen costs)
- High resolution, photo quality images
- Large mosaic facades
- Color matching
- Multiple colors

Urban Renewal - UV Resistance - Solar Control - Shading Control
