

THE FUTURE OF SHOWER GLASS PROTECTION

Enhance your shower doors with machine-applied Diamon-Fusion®.

Diamon-Fusion® Glass Treatment

Diamon-Fusion® is an optically clear, easy-to-clean coating that transforms ordinary glass into a hygienic, water-repellent surface. By chemically bonding to the glass, Diamon-Fusion® fills in the microscopic peaks and valleys of the surface, creating an ultra-thin barrier resistant to stains, etching, and corrosion.

- > Advanced glass coating technology
- > Protects against stains, mold, and mildew
- > Reduces cleaning time up to 90%
- > Backed with a lifetime warranty
- > No aftercare products needed

FuseCube™ (Express) Machine Application

The FuseCube™ (Express) is a glass coating machine that applies Diamon-Fusion® protective coating onto both sides of the glass through a proprietary chemical vapor deposition (CVD) process. It is the industry-leading coating application process, ensuring optimum coverage, excellent quality, and maximum value.

Highest-Quality Application Process

Utilizing a CVD process, Diamon-Fusion® is fused onto both sides of the glass, transforming the surface into a high-performing substrate. The chemical bond created during the CVD process is regarded as the most durable in the industry, providing unique value-added benefits to glass shops and their customers.

Double-Sided Coating and Consistent Coverage

Get double the coverage on all your shower doors, every time – guaranteed. The FuseCube™ (Express) consistently applies Diamon-Fusion® onto both sides of the glass, providing customers with double the protection and a new differentiator for your business.

Increase sales and profit margins

Add more value to your shower doors

Eliminate backward installations

Reduce transit and handling damage
(Diamon-Fusion® is scratch-resistant)

Unmatched Marketing and Sales Support

Increase customer traffic, build stronger credibility, and provide an exceptional customer experience. By partnering with DFI you get access to an online dealer locator that helps grow your business, an intuitive shower door warranty system where DFI takes all your customer callbacks, and in-store promotional materials that can be used to educate the homeowner.

About Diamon-Fusion International (DFI)

As a global developer of easy-to-clean, low-maintenance coatings DFI has positioned itself as the industry-trusted glass protectant for homeowners, architects, contractors, and fabricators worldwide. Their flagship product, Diamon-Fusion[®], has been applied to millions of shower doors and prestigious landmarks around the world, helping to keep glass looking cleaner and more beautiful for longer.
